

ROOF SHAPE

SEAN

Roof shape data was taken from the Ethnographic Atlas (made available by D-PLACE, see table 1). Figure 1 shows the roof shape for societies speaking Indo-European languages. The trait shows a strong phylogenetic signal (Pagel's $\lambda = 0.953$).

	Frequency
Beehive shaped	57
Conical	353
Flat	95
Four slopes	88
Hemispherical	103
One slope	15
Rounded or semi-cylindrical	38
Semi-hemispherical	8
Two slopes	377
